

Ratios

- 1) What is the ratio of grey rectangles to white rectangles in the following diagrams?

- 2) This recipe makes 12 large scones:
- one pound (equals 16 ounces) of self-raising flour
 - 4 ounces of butter
 - 2 ounces of sugar
 - 1 cup of milk

How much of each ingredient is needed to make 18 scones of the same size?

- ___ ounces of flour
 - ___ ounces of butter
 - ___ ounces of sugar
 - ___ cups of milk
- 3) I make some green paint by mixing yellow and blue paint in the ratio of three to one (3:1).
- I want to make 12 litres of paint, how much of each colour do I need? _____
 - Later, I need to mix up one more litre of the same green colour, how much of each colour do I need now? Give your answers in millilitres.
